PROFESSIONAL PROFILE

Software Engineer with an M.Sc. in International Software Systems Science and experience in AI systems, computer vision, dashboards, cloud platforms, and full-stack software development. Strong background in Python, C++, JavaScript, SQL, React, FastAPI, Docker, Kubernetes, TensorFlow, and RAG-based applications. Experienced in healthcare technology, analytics platforms, and production-oriented engineering workflows, with German language skills at A2 level and ongoing B1 learning.

PROFESSIONAL EXPERIENCE

Siemens Healthineers

- Working Student | Germany 08/2025 – 09/2026
- Develop and maintain dashboards for reporting, operational monitoring, and workflow visibility in healthcare technology systems.
 - Support internal platform work including TASSI through testing, dashboard improvements, and workflow optimisation tasks.
 - Use SnapLogic to support integration and automation workflows across connected systems.
 - Collaborate with cross-functional stakeholders to improve process efficiency and data-driven operational workflows.

Codebucket Solutions Private Limited

- Data Scientist Intern | Remote 01/2024 – 09/2024
- Built Power BI dashboards and DAX-based data models for analytics, business reporting, and decision-support workflows.
 - Optimised Azure cloud infrastructure to improve performance, scalability, and operational cost efficiency.
 - Developed Python and SQL-based machine learning workflows for predictive analytics use cases.
 - Worked in Agile teams, contributing to sprint planning, testing, debugging, and technical reviews.

Mindtree Ltd

- Software Engineer | Bangalore, India 07/2021 – 08/2022
- Developed enterprise applications and analytics workflows using Apache Superset and CVAT for client-facing solutions.
 - Built dashboards and visual analytics features to improve data visibility for business and technical stakeholders.
 - Implemented computer vision workflows using TensorFlow for image recognition and classification tasks.
 - Contributed to frontend improvements, testing, debugging, and stakeholder-driven feature enhancements.

SELECTED PROJECTS

- Master's Thesis – Emotion Recognition in Argumentative Text** 10/2025 – 04/2026
 - Researched emotion recognition using transformer-based models, instruction-tuned LLMs, zero-shot transfer, LoRA adaptation, chain-of-thought prompting, and retrieval-augmented prompting.
 - Evaluated model performance using macro-F1 and analysed relationships between emotions and argument convincingness.
- CodeReview Genie – AI Repository Question Answering System** 03/2025 – 08/2025
 - Built an AI-powered question-answering system for GitHub repositories using Retrieval-Augmented Generation architecture.
 - Integrated FastAPI, React, LlamaIndex, ChromaDB, GitHub OAuth, and OpenAI embeddings; evaluated 10 repositories with average F1-score of 0.98.
- Systems Programming in C++20** 2025 – 2026
 - Implemented systems-level projects including virtual machines, heap data structures, sorting algorithms, and memory representation utilities using Linux, CMake, Makefiles, Git, and gdb.
- Microservices Beverage Storing System** 2024
 - Designed and deployed a microservices-based application using Docker, Kubernetes, Minikube, and Docker Compose.
- BIT Campus Augmented Reality Navigation System** 11/2020 – 07/2021
 - Developed an Android-based augmented reality indoor navigation application using Unity, Android SDK, and Metaio; implemented AR marker detection workflows and published related research in IRJET.

CORE SKILLS

- Programming**
Python, C++, Java, JavaScript, SQL, HTML, CSS
- AI / Data / Computer Vision**
TensorFlow, PyTorch basics, OpenCV concepts, RAG pipelines, LlamaIndex, ChromaDB, OpenAI embeddings, Power BI, Apache Superset
- Backend / Full Stack**
FastAPI, React, REST APIs, GitHub OAuth, dashboard development, authentication workflows
- Cloud / DevOps**
Azure, Docker, Kubernetes, Minikube, Docker Compose, Linux, Git, CMake, Makefiles, gdb
- Automation / Integration**
SnapLogic, workflow automation, Agile development, code review, testing

EDUCATION

- Otto-Friedrich-Universität Bamberg**
M.Sc. International Software Systems Science
Bamberg, Germany Completed 2026
- Bangalore Institute of Technology**
B.E. Computer Science and Engineering
Bangalore, India 07/2017 – 08/2021

LANGUAGES & CERTIFICATIONS

- Languages**
 - English – professional working proficiency
 - German – A2, currently learning B1
- Certifications**
 - Data Science with Python and Machine Learning
 - Internet of Things (ESCA)
 - Modern Web Application Development with MEAN Stack
